

LINEAR DIFFUSERS

INTEGRATED PERFORMANCE

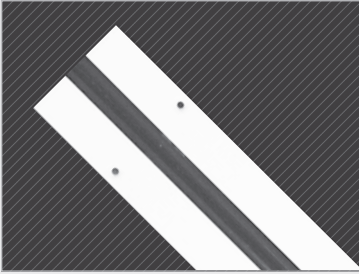

Providing total integration along curves and straight lines.

 **KRUEGER**

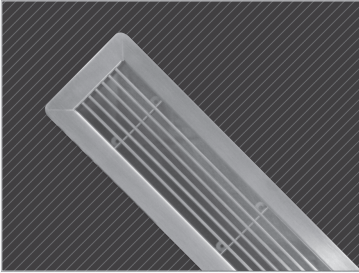

DesignFlo® Linear Diffuser

- Architectural extruded aluminum construction with integral horizontal or vertical pattern controllers on 24" centers.
- 1 or 2 slots available (depending on frame).
- 1", 1 1/2", 2", 2 1/2", and 3" slot widths available (depending on frame).
- Single section lengths: 12" (min) to 144" (max).
- Curving available.

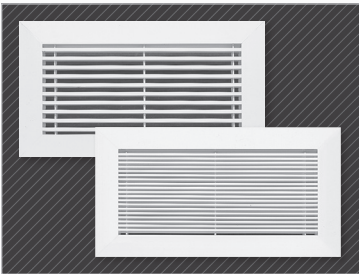

1900 Linear Diffuser

- Extruded aluminum construction with adjustable, removable blades.
- End borders: butt cut, end cap, or end plate.
- Single section lengths: 12" (min) to 72" (max).
- 1 to 8 slots with widths of 1/2", 3/4", and 1".
- 1 to 4 slots with widths of 1 1/2", and 2".
- TechZone™ ceiling system compatibility.
- Curving available.

91610 Stainless Steel Linear Bar Grille

- 304 stainless steel construction (optional 316 stainless steel).
- 1/8" thick bars with 3/8" spacing set at 0° or 15° deflection.
- Single unit size: 60"x24".
- No screw holes or countersunk screw holes with #6x1 1/4" stainless screws.
- Curving available.

1500 & 1800 Linear Bar Grilles

- Extruded aluminum construction.
- 7/32" bars on 1/2" or 7/16" centers.
- Support bars at 6" (1800) or 9" (1500) max spacing, floor mount.
- Bars set at 0°, 15°, or 30° deflection.
- Single section size: 72" max.
- Removable core.
- Curving available.

Curving Linear Products

While often joined together to create long, straight, continuous runs, linear slot diffusers and linear bar grilles can also be precisely curved to meet the requirements of more complex architectural applications.
