DIMENSIONAL DATA | SIZE 3 - 6 | BASE UNIT WITH HOT WATER HEAT | CONTROL ENCLOSURE OPTIONS

90° FACING LINE VOLTAGE ENCLOSURE

- Line voltage enclosure is mounted to direct NEC clearance requirement parallel to airflow.
- Enables easier placement during design and installation.

* Check NEC for unit clearance requirements.

BOTTOM FACING ENCLOSURE

- Electrical enclosure door opens downward and is serviceable from underneath the unit.
- Direct NEC clearance requirement below the unit (towards the floor).
- Enables easier placement during design and installation.
- Easier serviceability with hard ceiling installation and limited ceiling access panels

* Check NEC for unit clearance requirements.

REMOTE MOUNTED LINE VOLTAGE ENCLOSURE

- Line voltage enclosure is tethered to the unit by 48" flexible conduit cable and is to be field mounted.
- Provides flexibility for the installer to place the unit in tighter ceiling spaces while maintaining NEC clearance requirement for the line voltage enclosure.

* Check NEC for unit clearance requirements.
