

# SPECIALTY PRODUCTS

## ALTERNATIVE SOLUTIONS

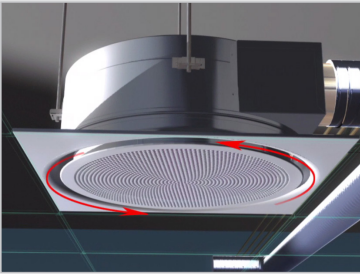

Meeting building requirements  
through different technologies.

 **KRUEGER**

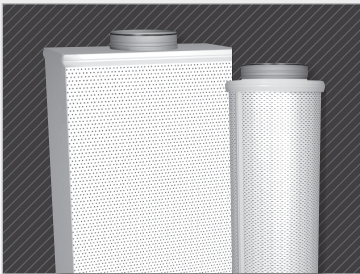

## Rectangular Chilled Beams

- Superior energy saving technology.
- Excellent sound performance.
- Low profile allows for floor to floor height reduction.
- Ideal for use in open office spaces.
- Cooling only or heating/cooling.
- Adjustable velocity control.
- Steel construction.

## Round Chilled Beams

- Ideal for use in open office spaces.
- Superior energy saving technology.
- Excellent sound performance.
- Low profile allows for floor to floor height reduction.
- Easy access to coil for cleaning.

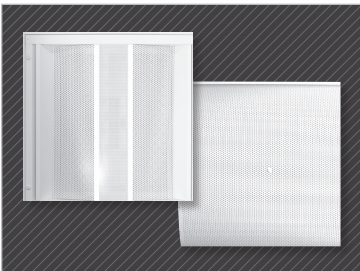

## Displacement Ventilation

- Ideal for use in schools and applications with stringent sound requirements.
- Heavy duty steel construction.
- Removable panels for easy cleaning.
- Non-clogging design.
- Energy efficient.
- Provides optimal in-space comfort with delivery of fresh air into occupied zone.

## FPD Underfloor Diffusers

- Removable, curved slot core, helical diffusers for raised floor systems.
- External damper indicator with internal damper stop.
- Extra wide trim ring flange prevents carpet from pulling away from diffuser.
- High-impact polycarbonate construction meets NFPA 90B structural requirements.

## Critical Environment and Operating Room Products

- Fan filter units.
- Sterilflo® (custom, stainless steel) and Sterilflex® (modular, aluminum) air curtain type operating room particulate control systems.
- Laminar panels for OR and cleanrooms.
- Radial diffusers for lab applications: TAD (in-space) and RF (recessed).
