

When it has to BE QUIET, it has to be Krueger.

Krueger's Quiet Fan Terminal delivers the *lowest sound levels* in the marketplace.

In today's commercial structures, sound performance is a major concern. Our team of professionals are dedicated to developing products that outperform the competition and take advantage of the latest technologies. Products like our Quiet Fan Terminal Unit (Model KQF) deliver the *lowest sound levels* in the marketplace.

- 1 Integral induced air attenuator. No bolt on components required to deliver the lowest sound levels in the industry
- 2 Rigid 20 gauge galvanized steel construction
- 3 Choice of linear or quadrant averaging air flow sensor
- 4 Single point electrical connection
- 5 Bottom access speed control
- 6 Quiet fan motors:
 - PSC type
 - GE ECM™
- 7 Integral hot water coil access
- 8 Easy 4-screw access to internal components
- 9 (14) casing liner combinations
- 10 ETL/CSA listed
- 11 ARI certified performance

- GE ECM™ TECHNOLOGY BENEFITS**
- Significant energy savings
 - Soft starts
 - Pressure independent fan air flow
 - Factory set fan air flow

Our commitment to product innovation goes beyond terminal units and includes a complete line of effective, air distribution solutions. To learn more about these exceptional products or any of our other air distribution solutions, call us at (972) 497-0400 or visit us at www.krueger-hvac.com for the name of the representative nearest you.
