SVE w/ ELECTRONIC CONTROLS CONSTANT VOLUME TO VARIABLE VOLUME RETROFIT TERMINAL UNIT

Standard Features:

- Converts constant volume systems to variable air volume.
- Easy, low cost installation into rectangular duct. The installer simply cuts a rectangular hole in the side of the duct, cuts away the insulation (where present), slides the unit into the duct and screws the mounting plate to the side of the duct.
- Analog electronic control packages supplied by Krueger include controller, damper actuator, and room thermostat
- Direct digital control packages may be factory mounted by Krueger from various manufacturers. Consult your Krueger representative for specific availability.
- Damper is constructed of 16 gage galvanized steel.
- Tight close-off damper. Leakage is less than 2% at 6" W.G. Ps.
- Gaskets under the mounting plate and at the end of the orifice plate seal the unit to the sides of the duct.
- LineaCross inlet velocity sensor with center averaging.
- Gauge tees for CFM measurement.
