

Introduction: 600 Series

The 600/5600 series transfer grilles are designed to ensure visual privacy while providing air circulation from one area to another. The 600/5600 provides a single side mounting frame for use where appearance is an issue on only one side, as in a utility or storage closet. The 600A/5600A provides a double sided mounting frame to fit varying door thickness, where a finished look is required on both sides, as in an office or kitchen door. The 600C is a core only unit useful in applications where a frame is not desired. The sight-proof blade configuration and unobtrusive appearance make Krueger's 600/5600 series grille an ideal choice for wall or door air transfer from room to room.

MODELS

- 600 - Steel, sight-proof grille with 1 1/4" steel frame.
- 600A - Steel, sight-proof grille with 1 1/4" steel frame on both sides, which adjusts to fit door thickness between 1 3/8" and 2 1/4".
- 600C - Steel, sight-proof single core and channel frame with 3/16" margin.
- 5600 - Aluminum, sight-proof grille with 1 1/2" aluminum frame.
- 5600A - Aluminum, sight-proof grille with 1 1/2" aluminum frame on both sides, which adjusts to fit a door thickness between 1 3/8" and 2 1/4".
